

Neonatal Evaluation and Outcomes Network

Summit started in 2015
Seventh Summit

What is NEON?

- Voluntary Regional (TX, OK) working group collaborating
- Goal: ensure that all NICU survivors maximize their potential
 - Quality, comprehensive developmental follow up care
 - Contribute to outcomes research
 - Track medical and neurodevelopmental outcomes: what is the trajectory?
 - Implement best evidence-based practices (Early CP diagnosis)
 - Dr. Nathalie Maitre and Dr. Andi Duncan
 - Advocate for continual care for survivors so they can cope with some of the long-term health and behavior impacts they may face
- <http://neonatal-net.org/>
 - Thanks to Judith Livingston, PhD, and her web-expert brother, Will Anglin, LLB, for being a part and helping NEON maintain and archive its history

Survival of the littlest: the long-term impacts of being born extremely early: Beating the odds

Survivor born at 26 weeks gestation, now studying effects of prematurity for a PhD.
“As a survivor of preterm birth, you beat so many odds.”

Nature 02 June 2020

- Please use chat to let us know who you are and what you hoped to get from this Summit
- Please chat for questions or comments, we will be monitoring to assist with Q & A due to large numbers of registrants.
